# Biden's Dream House

Examining the cost of Biden administration policies on American families' everyday household expenses

**COST INCREASE PER HOME \$9,166 ↑**

**Gas Furnaces: \$494 ↑**

New gas furnace efficiency standards will cost consumers an additional \$494 on average.

**Water Heaters: \$2,800 ↑**

New energy standards would force families to purchase models that are \$2,800 more expensive.

**Cars: \$932 ↑**

New fuel economy regulation on SUVs and pickup trucks will increase up-front prices by \$932 per unit.

**Dishwashers: \$225 ↑**

Drainage problems resulting from new efficiency standards leads to clogging, which can cost between \$50 and \$400 to repair.

**Gas Stoves \$800 - \$3,250 ↑**

Bans of future gas stoves would force consumers to install new electric outlets (approx. \$350), and purchase new electric models costing between \$450 and \$2,800.

**Ceiling Fans: \$25 ↑**

New proposed regulations would cost consumers about \$10 per fan. The average U.S. household has two to three ceiling fans.

**Washers: \$200 ↑**

New standards for washing machines would increase per-unit prices by roughly \$200.

**Air Conditioner: \$1,100 ↑**

Outlawing R-22 refrigerants will dramatically hike prices to refill traditional air conditioning units.

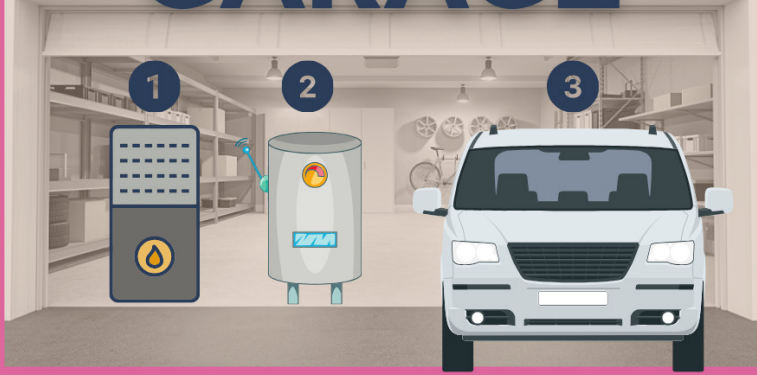

**Light Bulbs: \$140 ↑**

New light bulb standards cost families an average of \$140 to light their homes

# GARAGE

1

## Gas Furnaces: \$494↑

The Biden administration estimates a new rule cracking down on gas furnace efficiency standards will cost consumers **an additional \$494 on average**.

2

## Water Heaters: \$2,800↑

Proposed Biden administration energy efficiency standards for water heaters would require new boiler installations to use electric heat pumps, which are **roughly \$2,800 more expensive** than standard electric models.

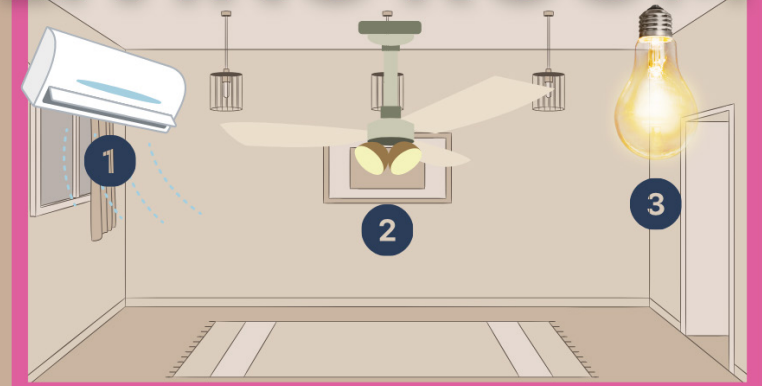

3

## Cars: \$932↑

The Biden administration estimates a proposed automotive fuel economy regulation on SUVs and pickup trucks will increase up-front prices by **\$932 per unit**.

# LIVING ROOM

1

## Air Conditioning: \$1,100↑

The Biden administration's move to outlaw R-22 refrigerants will dramatically hike prices to refill traditional air conditioning units.

2

## Ceiling Fans: \$25↑

The Biden administration estimates proposed regulations on ceiling fans would cost consumers about **\$10 per fan**. The average U.S. household has two to three ceiling fans.

3

## Light Bulbs: \$140↑

The administration's effective ban on incandescent light bulbs means Americans will have to switch to bulbs that are **\$3.50 more expensive on average**. The average American household has more than **40 light bulb sockets**.

# KITCHEN

# LAUNDRY ROOM

1

## Dishwashers: \$225 ↑

A proposed Biden administration regulation would prevent effective flushing of food particles, leading to drainage problems and clogging, which can cost **between \$50 and \$400 to repair.**

2

## Gas Stoves \$800 - \$3,250 ↑

New proposed Biden administration rules banning future gas stoves (which are already being instituted in some progressive cities) would force consumers to install new electric outlets (**approx. \$350**), and **purchase new electric models costing between \$450 and \$2,800.**

1

## Washing Machines: \$200 ↑

Manufacturers say proposed Biden administration energy efficiency standards for washing machines would increase per-unit prices by **roughly \$200.**
